

TABLE OF CONTENTS

1.	Introduction.....	1
2.	Anatomy of a GDL Object.....	5
	What is a GDL Object?	5
	Creating an Object.....	7
	Open an Existing Object for Editing	9
	Placeable Objects.....	11
	Object Subtype	12
	Parameters	14
	Subtypes, Parameters and Template Objects	17
	Object Details	20
	The GDL Scripts.....	21
	Preview Window.....	25
	Drawing Fragments	25
	2D Symbol.....	26
	2D Full View	26
	3D View	27
	Preview Picture.....	27
3.	Variables	29
	Assigning a Value to a Variable	30
	Naming Variables.....	32
	Variable Type.....	33
	Array and Vector Variables	35
	Scope.....	38
4.	Operators and Expressions	41
	The Equals Operator.....	42
	The Inequality Operator	43
	Order of Operations.....	44
	Using Brackets to Control the Order of Operation	45
	Logical Operators.....	46
	Bit Operators	48
5.	Working with Text Strings	51
	Number of Characters in a String.....	52
	Searching for a Text within a String.....	52
	Reading Part of a String	53
	Substituting Text	53

	Displaying Numeric Data as a String	54
	Displaying the Current Date and Time as a String.....	58
	Extracting Numeric Data from a String.....	60
6.	Using the Stack	63
	Using Put and Get to Simplify Scripts.....	64
	The Use Function	67
	Clearing the Stack	67
	Put and Get Data within a Block.....	67
	When to Use the Stack	68
7.	Loops.....	69
	The 'for-next' Loop	69
	The repeat – until and while – endwhile Loops	72
	Infinite Loops.....	74
	Practically Infinite Loops.....	78
8.	Scripting Style	83
	Write Readable Code	84
	Structured Scripting	90
	Managing Transformations	92
	Legible vs. Efficient	92
9.	Macros & Sub-Routines.....	95
	Macros	96
	Sub-Routines.....	106
	Re-Usable Sub-Routines.....	108
	Macros or Sub-Routines?.....	112
10.	The 2D Symbol.....	117
	2D Transformations.....	118
	Attributes.....	120
	The 2D Symbol Drawing Window	121
	2D Line Segments	126
	2D Circles and Arcs.....	127
	Ellipses	130
	2D Splines.....	131
	2D Fill Polygons	132
	Drawindex	145
11.	The 3D Model.....	147
	General Controls.....	148

	3D Transformations.....	150
	Basic 3D Elements	152
	3D Polygons and Planes.....	157
	Prisms, Slabs and Extrusions.....	159
	Revolved Forms	167
	Tubes	171
12.	Groups & Solid Element Operations	175
	Solid Element Operations	176
	Defining a Group of Elements	178
	Placing a Group	179
	Nested Groups.....	179
	Group Operations.....	180
13.	Text	183
	Selecting a Font and Script Type	184
	Smarter Font and Script Type Selection	186
	Defining a Text Style.....	195
	Text Size.....	197
	Placing a Single Line of Text.....	198
	Defining a Paragraph.....	200
	Using Paragraphs.....	205
	Text Orientation	207
	Text in 3D	210
14.	Working with Graphics	213
	Creating an Image with Transparency.....	214
	Images for the Object Settings Dialog	216
15.	User Interface.....	221
	Selection and Referencing	222
	Graphic Editing.....	225
	The Custom Settings Palette.....	232
	Images in the User Interface Palette.....	237
	Outfields	237
	Basic Infields.....	238
	Values Lists & Graphic Infields.....	241
	Buttons	242
	Tool Tips	244
	Organizing Data	244

	Interactive Parameters.....	248
	Working with Selections of Multiple Objects	249
	Language	249
16.	Approximating Curves.....	253
	Circular Arcs	254
	Ellipses	256
	Helices	257
	Bezier Splines	259
	Traditional Cubic Splines	266
17.	Linear Algebra 101	279
	Scalars and Vectors.....	280
	Vector Components	281
	Vector Notation	282
	Vector Diagrams.....	283
	Length of a Vector.....	283
	Equivalent Vectors	284
	Adding Vectors.....	284
	Scalar Multiplication	286
	Unit and Zero Vectors	287
	Cross Product	289
	Perpendicular Vector in 2D.....	293
	Dot Product	293
	Equation of a Line.....	295
	Equation of a Plane.....	295
18.	Linear Algebra Applications.....	297
	Does a Point Lie on a Line Segment?.....	298
	Parallel Lines	302
	Intersection of Two Lines in 2D.....	305
	Intersection of Line Segments	308
	Intersection of a Line Segment and an Arc in 2D	310
	Calculating an Angle	317
	Intersection of 2 Arcs	319
	Equation of a 2D Arc through 3 Points	322
	Closest Point on a Line.....	328
	Closest Point on a Line Segment	331
	Distance between a Point and a Line	334
	Distance between Two Lines.....	335

	Find the Points of Closest Approach.....	338
	Distance between a Point and a Plane	341
	Closest Point on a Plane	341
	Intersection of a Line and a Plane.....	341
19.	Matrix Transformations	343
	Elementary Transformation Matrices	343
	Matrix Multiplication	346
	Multiple Transformations.....	348
	Translations.....	349
	The xform Command.....	349
	Calculating Natural Co-ordinates.....	351
20.	Freeform 3D Modeling.....	353
	Cardboard Cut-Outs.....	358
	Basic Texture Mapping.....	367
	3D Modeling.....	371
	Freeform Modeling.....	378
	Advanced Texture Mapping.....	387
	Randomizing Objects.....	392
	Trouble Shooting.....	394
21.	Polygon Operations.....	395
	Defining a Polygon	396
	Polygon Area	397
	Polygon Sense.....	399
	Check if a Point Lies Inside a Polygon.....	400
	Polygon Addition.....	403
	Intersection of Two Polygons.....	413
	Subtract One Polygon from Another	415
	Offset a Polygon	417
	Closest Point on a Polygon	422
	Center of Gravity	423
	Optimizing the Polygon Operations.....	425
22.	Optimizing for Speed.....	427
	Speed Testing.....	428
	Use Efficient Algorithms.....	429
	Calculate Only when Required.....	431
	Reduce the Polygon Count	432

Provide Optional Data.....	438
Use Group Operations Sparingly.....	438
23. Quality Control	439
Scripting Style	440
Testing.....	443
Fixing Issues.....	445
24. Development Strategies	447
A Model for Development	448
Opportunity	451
Some Thoughts on Planning and Design.....	455
Improving the Resource Pool	460
Implementation.....	462
Testing.....	462
Maintenance.....	463
Appendices	464
A1: Barrel Bridge Example.....	464
A2: Playground Swing Example.....	468
A3: Boat & Trailer Example	488
